

DREAME

AirPursue™ PM10 Purifier

Adaptive airflow for every move

Dreame AirPursue™ PM10 Purifier

Adaptive airflow for every move

Dreame Air Purifier delivers pure or cooling airflow through a dual-way outlet, while intelligent induction and millimeter-wave radar technology help adjust the airflow wherever you are. Remove pollutants, bacteria, and viruses for healthier air, monitor air quality on the LCD screen, and control it via the interactive app.

Key Features

Precise Airflow Tailored to Your Movements

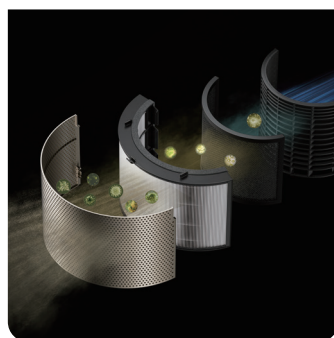

The millimeter-wave radar rapidly detects and tracks your real-time movements while adjusting airflow direction. The Purifier delivers fresh air within 5 meters* and a 120°* coverage. When multiple people are present, the wind will flow between them.

*120°, 5m: Based on tests in our in-house lab. Actual performance may vary.

Custom Air Comfort in Any Weather

Relish efficient cooling and thorough air purification free from viruses on demand. The dual air-way design (upward and forward) enables Dreame Air Purifier to serve as an air purifier or a fan.

Highly-Efficient Filtration for Healthy Air

Experience safe breathing with a multi-layer filtration system, effectively capturing tiny particles and allergens as small as 0.3 microns*. The Purifier detects and eliminates up to 14* types of air pollutants and 9* types of bacteria and viruses.

*0.3µm, 14 types, 9 types: Based on tests in our in-house lab.

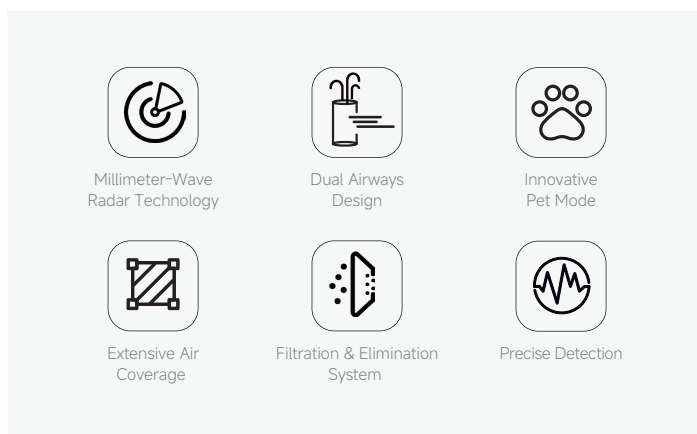

Instant Air Insights

With the help of 7D monitoring sensors and real-time pollutant and allergen data, you can effortlessly check indoor air quality on the LCD screen. Adjust modes and easily set humidity or temperature levels in the Dreame App.

Specifications

Capturable Minimum Particle Size	0.3µm
Filtration Efficiency	99.97%
Pollen Filtration Efficiency	99.66%
PCADR (Particulate Matter)	300m³/h
FCADR (Formaldehyde)	165m³/h
Air Distance	10m
Even Cleaning Area	100 m²
Noise	60dB(A)
Screen	LCD
