Smarter controls

C1727

Smart programmer
with 2-channel receiver

H3747

Smart programmer
with 4-channel receiver

C1727

Smart programmer
with 2-channel receiver

The new C1727 is a 2-channel receiver which can control combi or system boilers. Out of the box it is wireless-enabled and can be fully controlled by app and with the optional Wi-Fi adapter that can make it fully smart and control your heating system outside of the home via an app.

It is ideal for replacing traditional wired controls for systems that require separate control of heating and hot water or up to two heating zones. It is compatible with standard 6-pin backplate offered with our popular CentaurPlus and ServicePlus timer, programmer range.

It includes load compensation algorithm that significantly improves boiler efficiency by preventing short-cycling and overshooting of temperature when used with programmable thermostat display (PTD).

Programmable thermostat display (PTD)

Simple yet effective control of your heating and hot water

Easy and intuitive
7-day programming

12 year battery life
warranty on PTD

Wireless control of
heating system

Target temperature
for heating zone

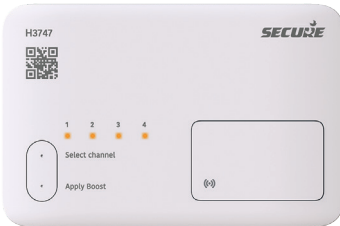

Nudge up your
temperature

Simple one-click button to set
your Home & Away settings

H3747

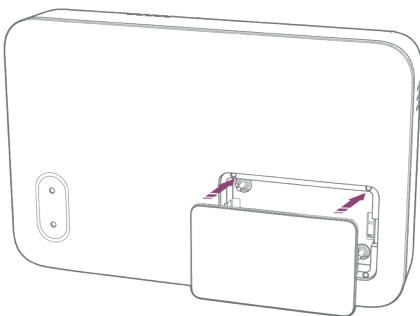

Smart programmer
with 4-channel receiver

The new H3747 is a 4-channel receiver which can control combi or system boilers. Out of the box it is wireless-enabled and can be fully controlled by app and with the optional Wi-Fi adapter can be fully smart and control your heating system outside of the home via the app.

It is ideal for replacing traditional wired controls for systems that require separate control of heating and hot water or multiple heating zones. It is compatible with standard 9-pin backplate offered with our popular ChannelPlus, programmer range and can easily replace the H37 or H47XL with only minimum wiring changes.

It includes load compensation algorithm that significantly improves boiler efficiency by preventing short-cycling and overshooting of temperature when used with programmable thermostat display (PTD).

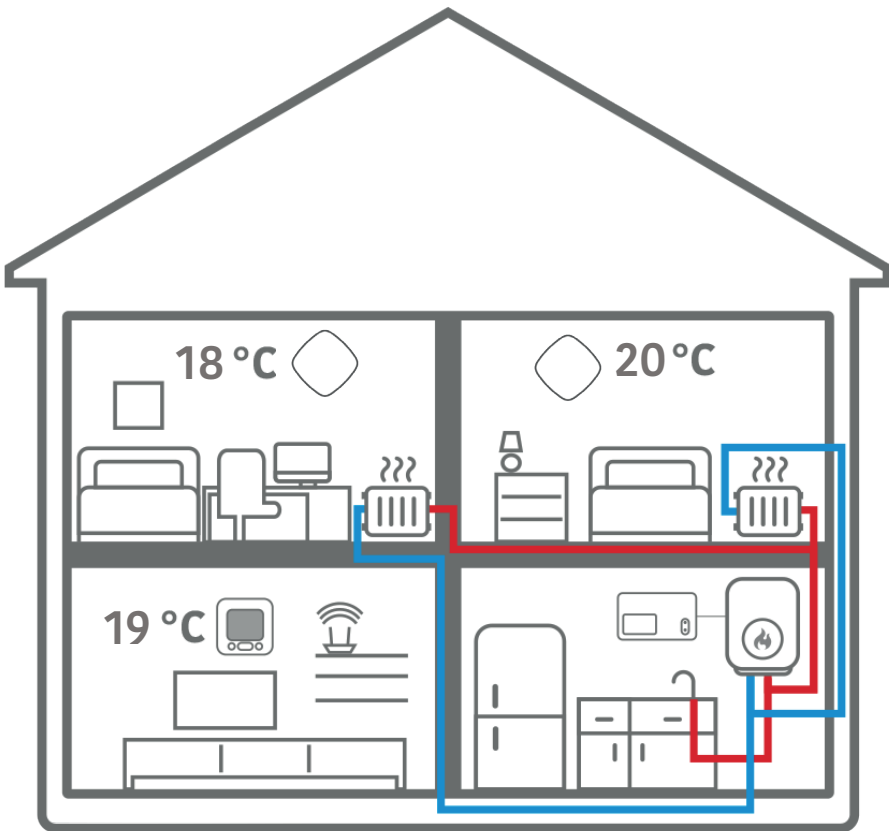

Wi-Fi adaptor is easy to install for full remote control outside the home

Upgrade with our Wi-Fi adaptor

To control outside your home

Out of the box the receiver can communicate with PTD and boiler using wireless technology and can be fully controlled by our app. With the optional Wi-Fi adaptor can be fully smart and control your heating system **outside of the home** via the app.

How the thermostat (PTD), receiver and sensors can be set up in a home.

Your app either uses wireless technology in the home without the need to have a Wi-Fi connection. If you want to have extra control of your heating outside your home you can upgrade your receiver with a Wi-Fi adaptor.

Add temperature sensors

Extra control for each zone

Add extra temperature sensors to any room in your home to have additional control over the temperature. It will work with PTDs, app or directly with receiver.

Features and benefits

Easy and intuitive 7-day programming

12 year battery life warranty on programmable thermostat display (PTD)

Uses wireless technology to connect to your smartphone, PTD, receiver and boiler without any Wi-Fi connection

Control heating from anywhere outside the home with the App when you add Wi-Fi adaptor

Programmable thermostat device comes pre-paired with receiver

Service interval reminder feature

Android and iOS App available to control your heating schedule, heating in zones

Professional installer App for quicker installation

6 or 9-pin configurations on backplate Click-off/Click-on easy installation

Retrofit on many existing controls* with convenient installation using 6 or 9-pin configurations on backplate

* Over 3,000 competitor products and 35 Secure/Horstmann products.

**BOILER
PLUS**
COMPLIANT

7
years
no quibbles
warranty

In the unlikely event that something goes wrong, no need to worry, we'll replace it. No quibbles.

Smarter App control

The C1727 and H3747 heating controls comes with apps for both installers and users.

Installer App

Set-up and commission easily

Easy set-up of devices in different zones

Wiring guides with augmented views

Guide to retrofit many competitor products

Guide to retrofit Horstmann/Secure products

User App

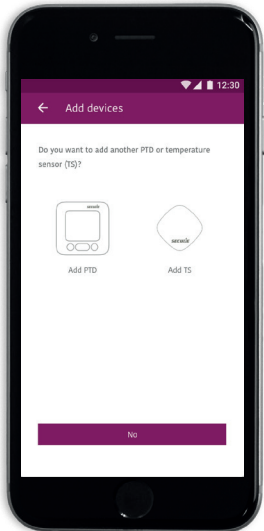

Control your heating

Control & monitor heating all areas of home and hot water

Daily/weekly scheduling

Set the right temperature in every zone for extra comfort

Easy set-up via app

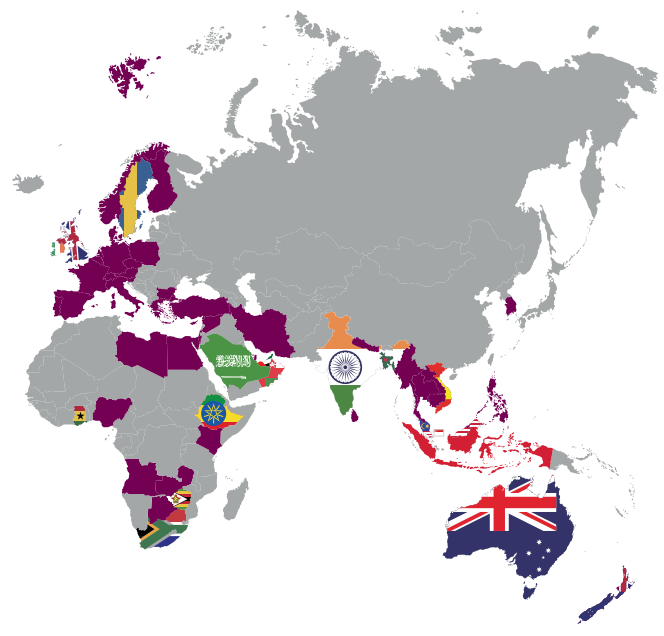

SECURE

Secure formerly Horstmann

The Secure Group provides end-to-end solutions, from smart grid metering to intelligent heating controls, in markets ranging from Australia to the UK.

Using our metering and control platforms, Secure is strongly committed and focused on energy conservation. Whether it be for industry, commercial establishments or homes, our equipment and services help the consumer understand their usage patterns and thereby enable control of their energy use.
